

MD

Instruments Ltd

Software Package for IBM-PC Based Computers

MD-soft

For All MD Series Hand-Held Meters

The MD_SOFT, developed by MD Instruments Ltd, is a software package which allows the user to interface the microprocessor based MD-series Hand-Held to an IBM-PC based computer.

The MD_SOFT can be used with all types of MD-series Hand-Held meters such as MD-1, MD-2, MD-3 and MD-4.

Applications

Typical applications of the MD_SOFT can be found in transferring stored data from the MD-series meter or carrying long term field trials using RS232C digital interface.

Features

- * Can be used with any DOS Operating system
- * Menu Driven to access files
- * Access RS232C with the provided cable
- * Can be used with MD-series Hand-Held meters
- * Carry out long term data collection using IBM-PC
- * Transfer stored data from the meter
- * View graphs to show trends of various measurements
- * View data tables of various measurements
- * Produce hard copies of graphs for reporting purposes
- * Produce hard copies of data tables for reporting purposes
- * One year free software update from date of purchase

In the interests of improving and updating its equipment, MD Instruments Ltd reserves the right to alter the specifications to equipment at any time.
